

The Declaration for the Republic of New Brunswick

The seafaring sovereigns and the tribes of our earth founded paths on the waterways and in the forests of a new land long ago by using the stars, their instincts and by skill through the reading of a compass. Farmers and villagers traveled from the south to start pretty towns and build bridges.

All sent prayers to the Great Spirit and Creator Almighty requesting favor and safety, freedom, prosperity and peace with the land while resisting man made tyranny. The true soul of our sovereigns has been laid bare and tested often.

This land became known as our beloved New Brunswick.

Mistakes have been made, wars have been waged, lives and knowledge have been lost.

The sovereigns of today inhabiting New Brunswick share a tremendous challenge as did our ancestors of the past.

The spirit and soul of the New Brunswick sovereigns, the native, the French and those of English ancestry have braided together through conflict, survival, and choices made as we share this rugged geography of wilderness and powerful coasts.

We choose now to unify and strengthen ourselves we the sovereigns humbly, clearly claim our destiny as sovereigns.

We acknowledge sovereignty resides in we the sovereigns. We have grown up together in this beautiful home.

Often violence has been part of our story and we desire to change our futures for the better.

We are finding our way out from under a great deception, a dark legacy that has been put upon us by corrupt lawlessness and soulless systems and individuals who have sought to destroy, rob, and bring every sort of evil to us.

To those who have carried out abuses of power upon us, trafficking our children, too gross to comprehend, you will not extinguish our faithfulness, our good will, our love for each other and our nation.

The destruction of our spiritual, community and family values will not be tolerated any longer, neither will the resorting to debt slaveries through excessive unlawful taxations which are supporting criminality, removing our freedoms, destroying the water and the forests, the cities and towns of our natural New Brunswick home.

We are called to find that shining path once again to hear the call of a new adventure within our warrior and saintly natures.

We will use our wit, our spirit, our good will, our hope and our love to restore what has been immorally removed from us.

The time is now to uphold the moral compass as we turn ourselves away from the rocks of corruption.

We choose more wisely to enter the clearing ahead to end oppressiveness within our borders, lands, and institutes.

We begin anew, a course for a brighter healthier and more prosperous future for all by the formation of a new republic, the republic of New Brunswick. Once labelled as the poorest province by the de facto government known as corporation Canada, we throw off this grievous diminishment of our true character and spirit.

We are a resilient, moral, compassionate, adventurous, spirited and faithful people.

We possess a merry and music making heritage.

We honor the elders in our midst and listen at their knees the many stories of victory and courage

We learn wisdom and truth from those whom came before healing for the nations is our contribution to the world through song and dance, sharing social media, peace pipes and cathedrals in the sainted towns, cities and rivers across our nation as we discover our love of travel.

We unashamedly speak of our love for our creator holding prayer in public spaces and celebrating diverse family and community events.

We stand boldly and take our place in the universe and align ourselves with other sovereigns.

We share in the healing of all by replacing fear and lace with our knowledge of medicines, therapies, alternatives, natural and traditional ways.

The concept “politician” will be erased and made obsolete from the collective consciousness and vocabulary within the republic of New Brunswick.

The devastation and harm purported against sovereigns has been so complete, we are unable to salvage any of the ideology of previous governances.

Politicians are banned from and shall not serve in any administration capacity due to the obvious failure to ever reform the economic, health, educational, political, justice, defense, police, never showing evidence to protect and respect sovereigns.

We have received instead lawlessness, power abuses, removal of our rights, corruption, property evictions, taxations used as a means of wealth building for themselves, predatory banking, deception, perversion, fraud, poverty, theft and elitist disdain and insults, injustice and inequality, and divisiveness.

We choose now to govern ourselves by constitutional assemblies to pursue justice and fairness, respect through a form of republic by appointments, selections and elections, through direct vote over representation.

Every vote, every voice is a benefit to the republic. Sovereign participation decides moral and lawful action and laws setting our priorities according to the sovereigns’ choices.

We the sovereigns of the republic of New Brunswick choose wisely ensuring happiness and freedom of speech as we pledge to act in the best interest of the sovereigns without harm, loss or injury, to reclaim our courts in the use of natural sovereign law rather than corporate law.

To harmonize ourselves requires us to be quite virtuous, a nation under god, transparent, caring, enlightened, to be just, healthful, faithful, abundant and free. As we heal ourselves, our nation, we realize we are home and are sovereign forever at last. UnifyThePeople.ca
